Professional Summary

Skilled frontend developer with 6+ years of experience in the telecommunication, e-commerce, banking, FinTech, B2B and B2C industry. Proven ability to take the ownership of projects from elaboration to delivery, collaborating with stakeholders to test and develop solutions. Expertise in Javascript, React, Vue, Next, React-Native, Redux, Node.js, PWA, MUI, Styled Components and Bootstrap libraries. Eager to contribute my passion for creating user-friendly, scalable and secure systems.

Employment History

Sr. Frontend Engineer, Mobile Live Inc

01/2021 - 02/2024

- Developed and maintained the Staples web application using React, Node.js and Contentful CMS with APIs integration.
- Implemented unit and integration tests to ensure the quality of the code.
- Optimized existing front-ends and designed new interfaces with responsive designs for upcoming products.
- Conducted discussions with stakeholders to define technical requirements and refine User Interface/User Experience designs.
- Implemented pixel perfect components including multistep forms & complex layouts for TELUS which is helping them to gain massive turnovers.
- Provided optimum solutions to Staples e-commerce store which increased their customers by 1.5x times and revenue by \$19M last year jumping to a whopping peak revenue of \$14.1B.

React Native Developer, Virtual Force Inc

11/2019 - 01/2021

- Worked on social networking application using React-Native and Expo.
- Developed and maintained a banking mobile application using React-Native cli, Redux, Sockets and Typescript.
- Developed reusable UI-Components with unit testing to ensure the quality of the code.
- Migrated the application to GCP, ensuring high availability and scalability.

Frontend Developer, Deltalabs

11/2017 - 11/2019

- Responsible for developing and deploying scalable mobile applications with continuous requirement gathering from the client and managing the frontend team in this startup.
- Implemented payment gateways, notifications, listing, filters, searching and dashboards.
- Developed a product having customer-provider duo mobile app to track and connect service providers to homeowners in real time which raised the funding of \$1.1M.
- Mentored colleagues, providing support in the frontend area and fostering a culture of continuous improvement
