Professional Summary

Senior Frontend Engineer with 8+ years of experience building scalable web and mobile applications across FinTech, E-commerce and Telecommunications. Expertise in JavaScript, React.js, Vue.js, Next.js, Node.js, React Native, Redux, Tailwind, PWA, MUI, Styled Components, Bootstrap libraries and Storybook with a proven track record of delivering products for international clients including Ninja (KSA), Staples (Canada) and TELUS (Canada). Experienced in end-to-end product ownership, modern engineering workflows and AI-assisted development using Cursor and Claude Code.

Employment History

Frontend Developer, MERN Solutions

06/2024 - Present

- Architected real-time performance analytics dashboard for Ninja's platform using React and Tailwind CSS, improving stakeholder data visibility by 40%.
- Optimized order and financial workflows through efficient state management and API handling, improving performance, maintainability and responsiveness.
- Collaborated with stakeholders to define technical requirements and refine UI/UX designs.

Sr. Software Engineer, Mobile Live Inc

01/2021 - 02/2024

- Developed and maintained the Staples web application using React, Node.js and Contentful CMS with APIs integration.
- Improved code reliability and reduced production bugs by 20% by implementing a comprehensive testing suite using Jest and React Testing Library, achieving 80% code coverage.
- Optimized existing front-ends and designed new interfaces with responsive designs for upcoming products.
- Implemented pixel perfect components including multistep forms & complex layouts for Telus which is helping them to gain massive turnovers.

React Native Developer, Virtual Force Inc

11/2019 - 01/2021

- Worked on social networking application using React-Native, Expo and PHP.
- Developed and maintained a banking mobile application using React-Native cli, Redux, Sockets and Typescript.
- Developed reusable UI-Components with unit testing to ensure the quality of the code.

Software Engineer, Deltalabs

11/2017 - 11/2019

- Responsible for developing and deploying scalable mobile applications with continuous requirement gathering from the client and managing the frontend team in this startup.
- Engineered a robust payment processing system and real-time notification engine, reducing checkout friction and increasing user engagement by 15%.
- Architected a real-time service marketplace using React Native and WebSockets, facilitating $1.1M in seed funding by delivering a seamless customer-provider matching experience
- Mentored colleagues, providing support in the frontend area and fostering a culture of continuous improvement.

Education

BS (Computer Engineering), FAST, Lahore
